

## **Irene's Action Plan for Positive Covid-19 Test**

### **If the infected person is a massage therapy student:**

- Irene's will comply with contact tracing efforts, working with the Department of Health
- The student must go into self-quarantine until they test negative and all symptoms ceased
- Anyone at Irene's who had close contact with the infected person within the previous two weeks is notified that they have been exposed, and they must self-quarantine for 14 days after their last exposure (may be shortened if accurate testing determines they are not infected)

### **If the infected person is a faculty or staff member:**

- Irene's will comply with contact tracing efforts, working with the Department of Health
- The person goes into self-quarantine until they test negative and all symptoms ceased
- Anyone at Irene's who had close contact with the infected person within the previous two weeks is notified that they have been exposed, and they must self-quarantine for 14 days after their last exposure (may be shortened if accurate testing determines they are not infected)

### **If the infected person is a student or supervisor working in the student clinic:**

- Irene's will comply with contact tracing efforts, working with the Department of Health
- All of the massage practitioner's clients from the two weeks prior to the positive test are informed that they were exposed
- Public health statements recommend that they then go into self- quarantine for 14 days after their exposure
- The room(s), equipment and locker that the student or supervisor used will be thoroughly disinfected and left unused for three days if possible
- The student or supervisor must go into self-quarantine until they test negative and all symptoms have ceased for 14 days
- Anyone at Irene's who had close contact with the infected person will go into self-quarantine for 14 days after their exposure (may be shortened if accurate testing determines that they are not infected)
